Ratings

Masterline

A handful of outstanding perennial ryegrasses

TetraStar is a recent member of the unique family of 4turf® varieties. The promising results and positive feedback from the existing 4turf® varieties allows us to set high expectations for TetraStar that shows even denser and finer leaves without compromising stress tolerance.

Anti-Stress - secures lawn performance

Whether the stress is linked to climatic extremes or diseases, TetraStar will contribute to better performance of the seed mixtures.

Disease tolerance

- + rusts
- + red thread disease
- + Microdochium patch (Fusarium)
- + leaf spot

Other common stress factors

- + Sport grounds: Wear and recovery
- + Winter survival/recovery, Performance in heat and drought
