QUICKSTON

Lolium westerwoldicum

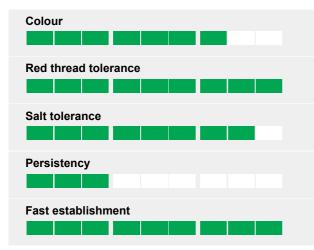

Westerwold/annual ryegrass

Fast estalblishment = key to success

- Rapid installation
- Low minimum germination temperature
- Accelerates ground cover & acts as nurse crop
- Disappearing rapidly!

Ratings

Fast establishment = fast ground cover = preserving playing quality

Visual appearance is important, but the role of Quickston is above all to secure a quick establishment in difficult situations and then disappear!

The perfect nurse crop

The low percent of Quicston that we recommend for mixtures is due to the fact that it's role is producing a quick ground cover but also allowing safe and fast establishment of the perennial species in the mixture.

Quickston has a darker green colour than previous generations

This is sometimes an advantage for a more homogeneous appearance.

Finer leaves

The leaf texture is finer and again an advantage in terms of visual appearance.

Period of overseeding

Recommended % of each species in the mixture

Species	Characteristic	Late autumn	Winter / Early spring	Spring till autumn
Westerwoldicum turf types	Rapid green up	25	50	Χ
4turf perennial ryegrass	Summer & winter stress tolerance, low temperature germination	25	25	X
Rough-stalked meadow-grass	Shade tolerance	20	Χ	Χ
Diploid perennial ryegrass (Low temperature germination)	Wear tolerance & Rapid germination	30	25	X
Diploid perennial ryegrass (All)	Wear tolerance	Χ	X	100
Total		100%	100%	100%
