

Westerwold/annual ryegrass

Taste It - and You'll Adopt It!

- Adapted to different climates
- Number one in yield
- High quality
- Highly competitive

Ratings

One in a Thousand

JIVET shows exceptionally large adaptation to climates and growing conditions.

This is evidence of a very high concentration of good genes in the genome.

Fast Yields

The main reason for growing westerwold ryegrass is to obtain as high yields as fast as possible.

JIVET proves its superiority by being on top of several variety lists.

Reliable Quality

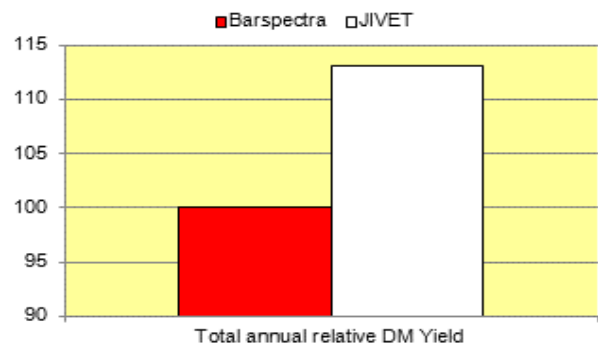

JIVET shows high lodging and rust resistance, Xanthomonas tolerance – all parameters assuring higher quality and yield.

Jivet compared with 6 other varieties
