

# CRYSTAL

*Festuca trachyphylla*

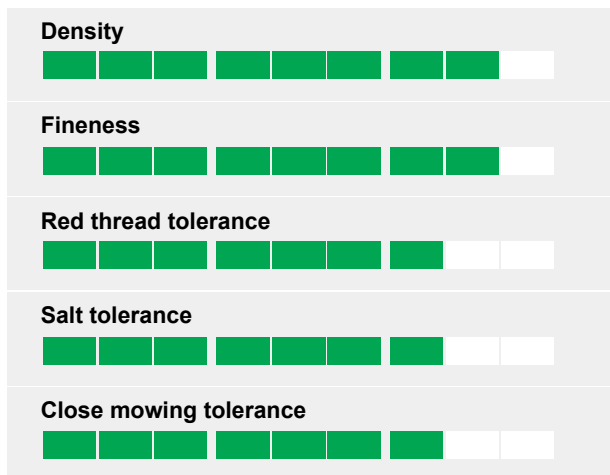

## Hard fescue

Top-ranked on the STRI list for Lawn

- Extremely dense turf
- Very high red thread resistance
- Adapted to low input
- Medium dark colour

## Ratings

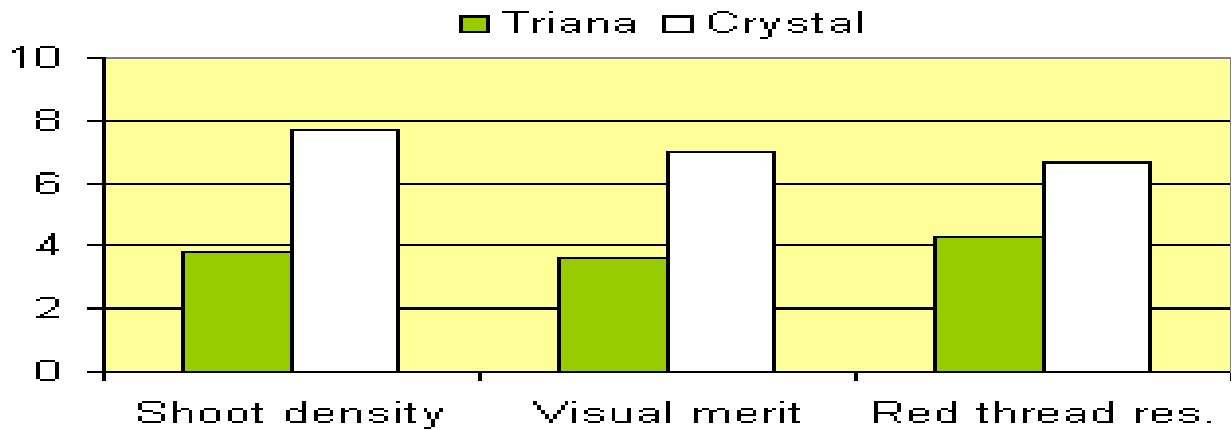

## Perfect for low input

CRYSTAL shows very high tolerance to red thread, the disease to fear when nitrogen fertilisation is nil or reduced. With limited wear and occasional drought and heat, hard fescue is one of the best possible species to choose

## Esthetics at maximum level

With an irresistible green colour, fine leaves and extreme density, the lawn resulting from CRYSTAL is very beautiful.

## Crystal compared to Triana
