Ratings

Density

Fineness

Wear tolerance

Colour

Red thread tolerance

Salt tolerance

It's a strike!

ESSENTIAL knocks down every doubt or worry you might have had – it is simply top scoring for every feature evaluated in official French trials. Much progress has been made in the breeding of tall fescue within the last 20 years, so a big step forward like this is just amazing!

Fully equipped variety!

The quality level of ESSENTIAL sets a new milestone with finer leaf texture, increased shoot density yet not compromising the wear tolerance.

Disease tolerance to secure performance

- Rust
- Fusarium blight and fusarium patch
- Drechslera leaf spot

Verified by RadiMax

Severe spring and summer drought is faced more often than ever by Professional turf managers. Together with Copenhagen University DLF is testing the root architecture and drought tolerance in the advanced screening facility RadiMax. - ESSENTIAL is Verified by RadiMax.
