Salt tolerance

Top quality color

The variety Bullseye has a very nice dark color combined with a very good fineness of leaves. Makes it a perfect variety for a fine and green lawns.

Good health, strong red thread tolerance

Bullseye has an excellent Red Thread tolerance, and will remain looking nice and green. Even during winter, the turf remains healthy and not very prone to disease attacks such as Fusarium.

Verified by RadiMax

Severe spring and summer drought is faced more often than even by Professional turf managers. Together with Copenhagen University DLF is testing the root architecture and drought tolerance in the advanced screening facility RadiMax.

BULLSEYE is Verified by RadiMax.
