

ANISHA

Poa pratensis

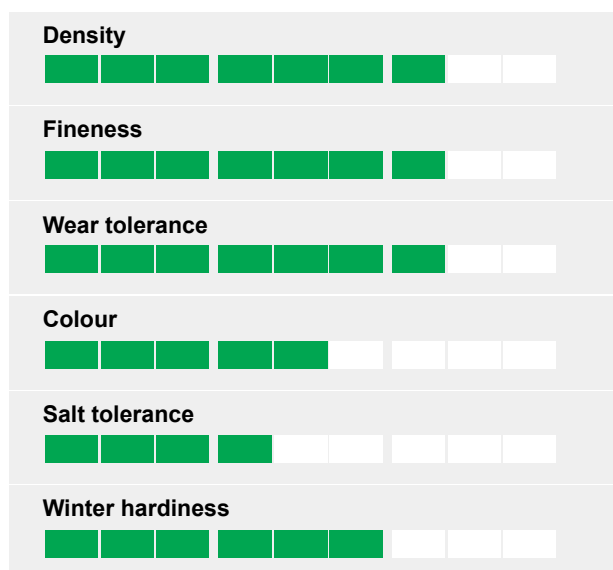

Kentucky bluegrass

Universal in use but professional in performance

- Fine leaved
- Good tolerance against leaf diseases
- Very dense
- Nice wear tolerance

Ratings

High performance level

Anisha has high scores compared to the typical performance of smooth stalked meadow grass. In particular the good wear tolerance is outstanding.

The very fine leaf texture of Anisha is not common for smooth stalked meadow grass.

It is combined with high shoot density, producing a nice, really dense turf. In German official trials, Anisha obtained a high score for density within the species.

High disease resistance

The disease resistance is of the same high level as the turf performance level from Anisha.

Use of Anisha

A variety for universal use with good sport performance.

The fine leaves also makes Anisha an option for ornamental lawns.

Good wear tolerance

RSM ranking (Germany); Scale 1-9, 9 = best

Variety	Lawn	Wear	Land-scape
Anisha	7	7	5

Very fine leaves

BSA ranking (Germany); Scale 1-9, 9=best

Variety	Fineness of leaf	Density
BSA List	2 to 6	5 to 9
Anisha	6	8
