Colour

Red thread tolerance

Salt tolerance

Close mowing tolerance

Shade tolerance

Winter hardiness

Master in shady conditions

Poa trivialis is mainly used in conditions where light is insufficient due to shade or in the winter months. SABRENA 1 performs very well in such conditions.

Darker green colour

SABRENA 1 renews the small group of available varieties by being darker green and even finer and more dense.

Recommendations

It is common to incorporate from 10-15% (weight) into mixtures used for shaded green areas and 10-30% for overseeding on golf courses or winter football pitches.
