Shady Place Hot & Dry

A top quality mixture specially formulated to produce an excellent lawn under shady conditions with good drought tolerance. A mixture of shade tolerant grasses will give the additional benefit of a top quality lawn which will maintain its appearance and colour in hot and dry conditions.

For semi and relatively dense shaded areas under trees and next to high walls and hedges. An ideal mixture for overseeding in spring or autumn.

To create and maintain a high quality lawn use an appropriate seedbed fertiliser before sowing. Once the lawn is established apply an appropriate lawn feed as required and overseed the lawn annually.
